

Neurological Vision Impairment Division

Hello!

Happy Summer to all. We are getting very excited about our upcoming pre-conference day at AERBVI International in St. Louis. We have a lot of folks registered and we hope you're one of them!

Perkins CVI Protocol

If you can't make it to St. Louis, we want you to be informed about the remarkable new, [Perkins CVI Protocol](#). This new, comprehensive approach to CVI Assessment will change the way we serve our students and grow our knowledge as a field. Catch Ellen Mazel, Director of CVI Research and Development and Educational Programs at Perkins on Wednesday, July 20th at the end of our NVID Pre-Conference Symposium. She'll be on hand to talk about the protocol and answer questions. The Protocol has been developed by a dedicated group of researchers, clinicians, and educators. Read more [here](#)

Professional Development Opportunity

Register [here](#) for the Northeast Resource Center for Vision Education's course

CVI VISUAL BEHAVIORS: ASSESSMENT AND EDUCATIONAL PROGRAMMING

Instructors: Ellen Mazel and Marguerite Tibaudo

Date: August 2nd and 4th, 2022

Time: 5:00-7:00pm and 5:00-8:00pm EST

As we understand more and more about the impact of CVI on the visual brain, we need to look to research in the field and to multiple assessment tools in order to effectively assess and program plan for our students with CVI. We now understand the huge variety of ways that the very complex visual brain can be impacted depending on the parts of the brain impacted, on the age of the child and on the visual opportunities that individual student has experienced. We must recognize that the child with CVI shares accessibility needs with all children with visual impairments and shares the need for all senses to have developmental consideration that includes visual access.

Cost: \$50

Instructional Format: Zoom
