

## AER Neurological Visual Impairment Division

---

Hello NVID!

A Happy, Happy Holidays and a Merry end of the year to you and yours. As we reflect on our gratitude and shared experiences this year, let us remember that we are all in this together. As always, we'd love to hear from you and what you're up to. We'll be providing an end-of-year wrap-up in January so you have all the resources in one place and we can look ahead to a new year of learning in 2022!

### **UMass Boston CVI Certificate Program**

The most exciting thing on our radar currently is the Northeast Resource Center for Vision Education's (NERCVE) [CVI certificate program](#). This fantastic program features 5 graduate-level classes each offering in-depth, practitioner-focused education on CVI. Classes range from Neurology and Vision Processing to Assessment and Intervention. Applications are due June 1st, 2022 for the next cohort.

### **TSBVI Coffee Hours**

You may or may not be aware of these fantastic opportunities for getting CEUs and the wide variety of topics available for TSBVI's coffee hour chats. We want to share a CVI-related topic coming up in January. On January 10th join CVI communication experts Chris Russell and Jen Willis for: Cortical Visual Impairment: Considerations for Augmentative & Alternative Communication Development. This is presented via zoom and you can register [here](#).

Check out the rest of the [schedule](#). You can also access past webinars on their site.

Wishing you happy and safe holidays,  
The NVID
